5. False

D. Answer the following questions

1. Define row heading

Ans: The row heading is the grey coloured number (1,2,3, etc) located in front of each row in the worksheet.

2. What is Ribbon in Excel?

Ans: Ribbon is like a strip that has various tabs such as Home, Insert, Page Layout, Formulas and Data.

3. What is an active cell?

Ans: The currently selected cell that appears highlighted with the green border is active cell.

4. Explain any two types of data that can be entered in a Excel.

Ans: The following type of data can be entered in Excel:

Numbers: Numbers include the digits (0-9) and their various combinations. All types of calculations can be done on numbers.

Text: Text includes the collection of letters, numbers, and special characters. No mathematical calculations can be performed on text.

5. How do you enter data in a worksheet?

Ans: To enter data in a worksheet follow the given steps:

Step 1: Click on the cell where you want to enter the data and start typing.

Step 2: To move down one cell, press Enter key.

6. Differentiate between contiguous cell range and non-contiguous cell range.

Ans: Contiguous cell range is a collection of cells that are adjacent to or next to one another. A colon (:) is used for specifying this cell range, for example, A1:A6.

Non-contiguous cell range is a collection of cells that are not adjacent to one another. A comma (,) is used for specifying this cell range, for example, A1, B2, C3 etc.

7. Write the steps to create a new workbook

Ans: To create a new workbook in Excel 2016, follow the given steps:

Step 1: Click on the File tab

Step 2: Click on the New option.

Step 3: Click on Blank workbook

A new workbook will be created

TECH TWISTER

A.

Answers:

1. D3

2. D5
3. E4
4. C4
5. B4
6. G4

B. Number the given steps

Click the File tab	-	1
Click on the Browse option	-	3
Click on the Save or Save as option	-	2
Type a name for your file in the file name box	-	5
Click on the save button	-	6
Select the location where you want to save your workbook.	-	4
