C. Answer the following questions.

1. Define Layers?

Ans. Layers are transparent sheets containing objects which are stacked on top of each other so that the individual properties of an object are preserved.

2. How are layers helpful in Krita?

Ans. Layers are useful in Krita as the layers help edit an object without affecting other objects.

3. How can multiple layers be used in a file?

Ans. To use the multiple layers in a file, follow the given steps:

Step 1: Insert an image into the file as a new layer.

Step 2: Click on the Text Tool.

Step 3: Apply desired formatting styles and click on Save button.

New object can be added as separate layers without affecting the properties of the objects in the other layer.

4. Explain use of Timeline.

Ans. Timeline is a rectangle shape section which is used to control and manage the animation of different objects and layers.

5. What is meant by animation?

Ans. Animation is a method by which images are manipulated in a manner so that they appear as moving objects. The animation takes place in number of small steps where an object is moved in small steps one at a time. Each step is depicted as a frame in the timeline.
